

# Night Owl

Proactive digital  
visual care system

## What is Night Owl?

Night Owl is a digital visual care system that creates a safer living space for users by recognising multiple potential risks, and helps professionals in care environments target interventions, increasing productivity and quality of care. Discreet infra-red cameras combine with AI intelligence to detect events such as falls, room exits and bed/chair occupancy without the need for additional sensors or wearable devices, or being disturbed by regular physical checks.

Real time alerts can be managed by monitoring centres, or onsite by carers using the Everon EMA app, and inherent system security and pixelation ensures privacy and protection. Night Owl operates in both the light and the dark, and two-way speech means service users and staff can communicate easily 24 hours a day.

### • Key Features

 Unobtrusive 24 hour support  
Security/pixelation for privacy and protection.

 Two-way audio communication  
Between service users and carers.

 Anonymisation options  
Enhance privacy and encrypt information.

## • Technical Features

### Size

165 mm x 65 mm x 45 mm

### Weight

450 g (incl. wall bracket), 1.2 kg  
(incl. packaging, wall bracket,  
POE adapter and cable)

### Camera

1080p IR

### Power

PoE-adaptor (included)

### Network

4G, Wi-Fi, RJ45

### Encryption

End-to-end (webRTC)

### Power consumption

3,5 W in standby mode

17 W in normal mode

Max 20 W

## Get in Touch

At Everon, we work with our partners to create bespoke solutions for every type of care setting.
